

LED therapy uses specific colour wavelengths of light that penetrate the skin at various depths. The light works to energise cells in the skin to produce collagen, improve elasticity and increase blood circulation and oxygen flow whilst releasing toxins.

A person's skin complexion is one of the first things we notice. This brand-new LED Facial Mask can easily produce noticeable results! It is non-invasive and helps in a multitude of ways.

Before treatment with visible red light

After 20 sessions

After 30 sessions

How does it Work?

Red - Stimulates the growth of collagen, which is an essential protein used to repair damaged tissues and to repair the old tissue. It can remove fine lines and shrink pores. Ideal for tender skin and anti-wrinkle treatment.

Blue - Ideal for destroying bacteria in acne, which contains porphyrins. Due to the high affinity with wave length, the blue light can kill these porphyrins. In addition, the blue light has a calming action, which is very effective for hypersensitivity.

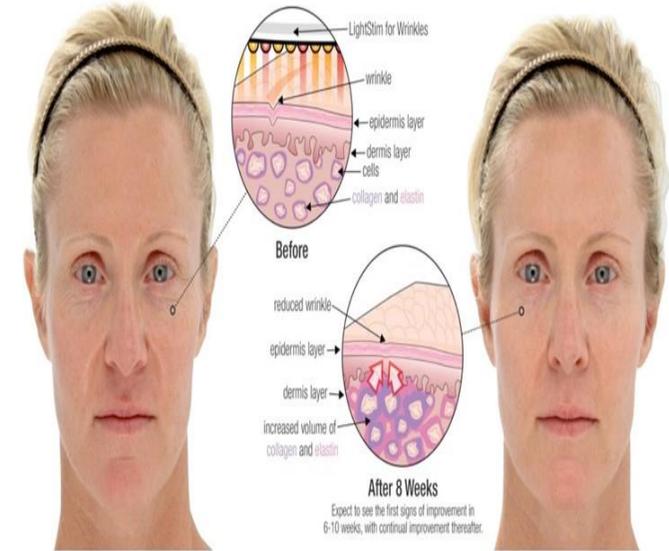

Green - Helps balance the colour pigment and reduce fine lines, improve ageing skin, speed up the healing process of wounds and lighten the skin. Can also enhance cell energy gradually, and has a good metabolism facilitating effect.

Purple - The combination of the red and blue light has a two phototherapy effect meaning it is especially effective on repairing acne scars and marks.

Yellow - This has a special 590nm wavelength, so it can improve the exchange of oxygen in the cells, to the skin cell replenishing their energy, decomposing pigment, promoting lymphatic drainage and improving the sight of wrinkles, rough skin etc.

Clear Blue - This neutralises and relieves mental stress and can enhance cell energy gradually, effectively dredging lymphoid and oedema.

Laser - This deeply penetrates the skin, speeding up the living tissue to accelerate the tissue metabolism and improve the appearance of fine lines and sagging skin associated with ageing.

The LED Mask can help with the following:

- ♥ Puffiness under the eyes
- ♥ Help fight fatty areas and improve skin elasticity
- ♥ Fight Acne
- ♥ Anti-aging
- ♥ Hyper pigmentation treatment
- ♥ Acne scar removal or reduction

- ♥ Softens fine lines and wrinkles
- ♥ Reduces the appearance of scarring
- ♥ Reduces cellulite
- ♥ Reduces pigmentation and sun damage

Express LED Opera Mask Facial
(45 mins) £40.00

To commence your facial, we will have a consultation, which will decide on the LED colours for maximum benefit to your skin. Your facial will then commence with a deep cleanse. The mask will be applied and you will receive two sessions, consisting of 15 minutes each, of the two colours agreed. Your facial will be completed with an application of one of our organic facial oils and blending cream.

Signature LED Opera Mask Facial
(60 mins) £55.00

As above, and including our anti-aging massage then finished with your recommended moisturiser and skin protection.

10% discount on course of 4 (payment in advance).

Please note this therapy is **NOT** suitable for pregnant woman, children, epileptic patients, thyroid patients and light allergy patients. We would also advise anyone with claustrophobia and / or anxiety this may not be the best therapy. We are happy to discuss this beforehand.
